

NOTE TO CONTRACTORS

Effective June 1, 2019

Superseded NOAs are no longer valid despite not having an expired date. NOAs are superseded when there is a change in product specification, an update due to code change, or a change in product ownership. Miami-Dade Product Control has issued superseded NOAs on dozens of products in the past two years, especially where roofing materials are concerned.

Please specify currently NOAs are submitted with your permit submittal to avoid unnecessary delay in permit review and approval.
