STRUGGLING WITH MATH?

Don't wait until it's too late, build your child's confidence in Math today!

Our experienced teachers are here to support your child's learning.

Learn to work with whole numbers, equivalent fractions, mixed numbers and proper fractions. Practice adding and subtracting fractions, comparing them, and simplifying fractions to their simplest forms.

Using a life-size clock mat to teach time is an exciting and interactive way to engage students, from our youngest learners to those in grades 3-5. The kids get to jump on the clock and use their entire bodies to practice telling time. This hands-on activity also provides opportunity to teach a variety of math skills while they have fun with the giant clock mat.

Each game encourages students to stretch, move, and twist as they reach for the number that matches the answer. Kindergarteners enjoy discovering the various colors and numbers, while older students like identifying factors, multiples, prime numbers, and composites.
