CLASS DESCRIPTIONS

- **Wacky Wonders Lab** – Dive into the wonders of science as you earn your special lab clearance, explore exciting hands-on experiments, learn real science skills and processes, and share your discoveries with fellow young scientists—all while tackling fun, challenging questions that spark curiosity and a lifelong love of STEM! You'll even learn how certain experiments can look just like magic tricks, using chemical reactions, motion, and light to create mind-blowing effects. With each activity, you'll uncover the “science behind the magic”.
- **Rock the Runway**– Get ready to tap into your creativity as you learn hand-sewing skills and to design your own clothing, while creating a wearable outfit for this season—then show off your amazing look in a fun runway show for friends and family, and take your outfit home to keep! Along the way, you'll build fine motor skills, explore how garments are made, and shine with confidence as you rock the runway in your very own design.
- **Shutterbug Adventures** – Express yourself through photography as you learn how to use high-quality digital cameras, explore the basics of composition, and capture creative, one-of-a-kind images to build your very own portfolio and gallery—then share your best shots with friends and family during your final class! Along the way, you'll discover how a digital camera works, practice taking unique photos, and develop your own artistic style.
